

Are you looking for an apprenticeship as a carpenter in a modern company?  
We offer it to you - become part of bau+art!

## Apprenticeship as a carpenter (m/w/d)

At bau+art you will have the first-class opportunity to lay a solid foundation for a successful career. During your 3-year apprenticeship, you will gain exciting insights behind the scenes of the world of sophisticated furniture and interior design. You will learn all the skills and abilities of a true carpentry professional! You will work on the living and high-quality raw material wood with traditional carpentry tools as well as with modern CNC machines. In addition, you will learn to produce sophisticated furniture and interior constructions and become familiar with reading technical drawings.

### What you should bring with you

- You have at least a secondary school diploma
- You are motivated, ambitious and enthusiastic about craftsmanship and design.
- You have already discovered that you enjoy working with wood
- You can concentrate and have stamina when learning something new
- Teamwork and open-mindedness are important to you
- Craftsmanship and a sure instinct are an advantage for you.

### What we offer to you

A modern and innovative handicraft company with a lot of competence and a familiar atmosphere. As a training company for many years, the passing on of knowledge and further education of all employees is an important part of our company and the basis for our success.

- A pleasant and very modern working environment in a nice team
- Varied work tasks from start of production to final assembly
- You will learn secret tricks from our master craftsmen and former journeymen
- Become part of a team of apprentices in different years.
- A BVG trainee ticket, drinks and work clothes are provided by us
- Subsequent employment in a successful family business
- Regular team events

### Who we are

bau+art is a modern furniture joinery, a manufactory in Berlin Marienfelde. Since 1987 we realize as a family-run company unique and extraordinary interior design projects. We combine traditional carpentry craftsmanship with modern technology and creative exchange of experience. With passion, ideas and an eye for detail we create lasting quality and satisfied customers only as a team. And we do it in a nearly climate-neutral way.
